**L Remarks**  
Local Option

Dispatched to a building fire, prior to arrival there was visible smoke from several blocks away and 300 was advised. Upon arrival Capt. 2 provided a size up with smoke showing from the alpha side bay door and the Charlie/delta corner. Dispatch was advised of a code 1 and Capt 2 was mobile command. E-2's DE had a hydrant and supplied himself. E-2's crew gathered all of our equipment and a charged jump line, in preparation for extinguishment. The bay door was cut open, E-2 entered, there was no visibility and immediately felt heat which was indicated on the TIC but as we advanced to the left, the temperature dropped so we changed position, searched to the right, had readings on the TIC well over 300 and found the fire inside one of the storage units. We forced the lock and extinguished it, however, additional flames were found in, at least, three of the adjacent units. Those were forced and quickly extinguished also. E2 exited, advised of par, changed bottles and reentered to check for hotspots. The fire was extinguished, shift change was upon us so command advised units to gather their crew and gear so we can transfer the scene unit by unit to the oncoming shift. C-shift released the scene to A-shift.

L1

# MIAMI BEACH FIRE DEPARTMENT

## APPARATUS NARRATIVE

<b>Incident #:</b>	2024-6504	<b>Unit Id:</b>	Ladder 1
--------------------	-----------	-----------------	----------

L1 made arrival and was immediately assigned to roof operations. Best location for the ladder was found to be on the Delta side of the building due to multiple power lines on the Alpha side of the building hindering our access. Ladder truck had to be repositioned and was back out from West Ave and re-routed to re-enter via 20<sup>th</sup> Street. Upon spotting the ladder on the Delta side of the structure we elevated the ladder onto the roof, providing a size up of conditions on the roof to command. Upon checking the roof for stability we dismounted the platform via the DE side door and checked for roof conditions. We found 4 skylights located on the four corners of the roof approximately 10 ft from the building ledge. We utilized a K12 saw to open all four skylights starting with the one on the AD corner, AB corner, BC corner, and CD side. Initial smoke and heat from each was considerable, however, it slowed as the fire attack continued interior. L1 crew returned all gear to the ladder and we got off the roof. We awaited an additional assignment and we were assigned to assist E2 crew with spot fires interior. We were also assigned to monitor smoke conditions from the bucket of the ladder as ventilation efforts during overhaul were taking place. Upon completion of this task we assisted with clean up and putting all gear back to the trucks then returned to service.

E-1

# MIAMI BEACH FIRE DEPARTMENT

## APPARATUS NARRATIVE

<b>Incident #:</b>		<b>Unit Id:</b>	Engine 1
--------------------	--	-----------------	----------

E1 was dispatched to the referenced QTH for a possible building fire. Upon arrival, E2 was seen pulling a jump line and cutting the overhead roll-up door. E1 crew, with full PPE and all appropriate tools, made our way to the Alpha side to assist E2. Shortly after, reports were being made that conditions on the Charlie side were worsening with heavy dark smoke emanating from upper windows and the rear door. E1 made our way to the rear and pulled 3" line off the rear of E3 and connected our high-rise packs at the door and made entry PAR 4. E1 advised of conditions (150 F w/ zero visibility) and advanced our hose until we made it to the end of our line. E1 advised command that we were unable to continue forward and that we have yet to find the fire. At that same time, interior crews on the Alpha/Delta corner advised that they found the fire and were applying water. E1 crew was advised to back the line out. E1 crew exited the Charlie side PAR 4 and then made our way to the Alpha side. E1 crew swapped our bottles out and then made entry PAR 4 into the Alpha/delta doorway. E1 crew advanced the hose as far as we can make it, extinguishing flare ups as we found them. E1 crew also pulled ceiling in the office area. E1 crew exited the structure on the Charlie side after extending our hose as far as we could make it. E1 crew swapped into a 3rd bottle and was assigned to standby. E1 crew was told to break down. E1 assisted in reloading hose and then went 09 back in service.

E3

# MIAMI BEACH FIRE DEPARTMENT

## APPARATUS NARRATIVE

<b>Incident #:</b>	2024-6504	<b>Unit Id:</b>	Engine 3
--------------------	-----------	-----------------	----------

E3 was dispatched to a full assignment in Zone 2. E3 made arrival on scene of a working Code 1 and was advised by command to make our way to the Charlie side of building. E3 walked to the Charlie side of building and noted heavy black smoke coming out from the Charlie side from the rear door and a window on the Charlie Delta corner toward the top of roof. E3 advised command of situation and was advised to search for the seat of the fire and go in with a water attack line. DE of E3 was advised to drop a 3 inch line off E3 so we could attach a gated wye and run multiple attack lines into the charlie side of the buidling rear door. E3 made entry into charlie side of buidling with charged 1 3/4 hoseline and worked our way toward the Alpha side of buidling with another highrise pack to extend and make it further into building. E3 noted the building had locked aluminum style storage units all through the buidling. E3 would check every door enrout through buidling with the TIC to see if there was any elevated temperature that would indicate a fire possibly in any of the storage units. E3 made progress almost to the Alpha side of buidling before running out of hoseline and was advised by command to return with hoseline back to the Charlie side of buidling. E3 exited Charlie side of buidling and was PAR of 4. E3 was advised by Command to go to rehab to switch out our air bottles and rest. E3 after switching out bottles and resting for moment was advised by Command to go ladder the Charlie Delta Corner of building and vent the window by top of the roof and check if there was a second floor by sounding floor with pike pole. E3 raised a 24ft ladder and vented window as instructed and was unable to sound a floor due to no second floor existing. E3 was then advised by command to make entry into the Charlie Delta corner to check for any elevated heat temperature. E3 made entry into Charlie side of buidling again with a charged hoseline and checked for elevated temperatures. E3 found no elevated temperatures in the Charlie Delta corner and noted the area of buidling had better visibilty as well. E3 advised command of findings and exited building via Charlie side of building with a PAR of 4. E3 was advised by command to break down E3 hoselines and equipment and go back into service.

## APPARATUS NARRATIVE

<b>Incident #:</b>	2024-06504	<b>Unit Id:</b>	Engine 2
<p>E2 A shift personnel responded in a spare rescue. Upon arrival we were briefed on the events and then we took over from the off coming crew. E2 A was assigned interior to check for extensions of the fire and over haul. E2 exited and set up fans for ventilation. We continued to enter the structure after the ventilation was shut off and extinguished hot spots that we found inside. E2 A shift remained on scene while the arson investigators were inspecting, that is also why sometimes we were called back in to extinguish hot spots that were found. E2 A retrieved any equipment we found that was used on scene. We checked the inside of the structure with our detectors and the readings were unremarkable.</p>

MIAMI BEACH FIRE DEPARTMENT  
APPARATUS NARRATIVE

<b>Incident #:</b>		<b>Unit Id:</b>	Resuce 22
--------------------	--	-----------------	-----------

R22 (C-shift) was second on the scene, right behind E2. R22 donned all appropriate PPE and obtained all necessary equipment. R22 pulled a 2nd jump line to back up E2, which made entry through the garage door (Alpha side). However, R22 noticed that E2 initially could not locate the fire. Therefore, R22 made entry through the front door on the Alpha side. There was little visibility due to the smoke inside. R22 initially advanced into a small office with a back room and a bathroom with no signs of fire or victims. R22 momentarily exited the structure to retrieve a New York Hook and exchange a flashlight. R22 reentered and advanced toward the middle of the structure. R22 found and extinguished a small fire in a locker adjacent to the office. R22 found a hallway with lockers just past the office towards the center of the structure. R22 found and extinguished three additional small fires in different lockers. R22 exited the structure when one of R22's low-air viber alerts went off. R22 swapped out SCBA bottles and awaited reassignment. Shortly after, personnel from the incoming shift relieved R22's crew.

300 C-SHIFT 2024-6504

# MIAMI BEACH FIRE DEPARTMENT

## APPARATUS NARRATIVE

<b>Incident #:</b>	2024-6504	<b>Unit Id:</b>	Division Chief
<p>Full assignment dispatched to above QTH reference possible building fire. Enroute to scene E2 advised of smoke seen prior to arrival. E2 made arrival and found smoke from Alpha side. E2 initiated command and advised of a code 1. E2 deployed a jumpline and forced entry through alpha side of the building initiating fire attack. R22 made arrival and backed up E2 with secondary line. E1 and E3 made arrival and advised of smoke coming from Charlie/Delta corner. Capt 5 assigned to safety and accountability. 300 assumed command. L1 proceeded to roof of building to initiate roof operations and ventilation. Capt 5 performed 360 and secured power to the building. E2 advised water on the fire. E3 performed a forward lay and provided a skid load operation to the rear of the building. E1 and E3 made entry through Charlie side and advanced hose lines for fire attack. R2 assigned to RIT. L1 provided ventilation by opening/forcing the skylights on the roof. Interior visibility and conditions improved. FPL made arrival and verified power was off to building. E2 advised fire out. Units were rotated through rehab. Primary and secondary search completed - all clear. R2 verified no extension to neighboring business to the bravo side. Overhaul operations initiated. Ventilation from the Alpha side was initiated. Due to shift change - transfer of C-Shift units to A-Shift was initiated. Face to face transfer to A-Shift command was performed. C-Shift units cleared the scene.</p>

300 A- Shift

# MIAMI BEACH FIRE DEPARTMENT

## APPARATUS NARRATIVE

<b>Incident #:</b>	2024-6504	<b>Unit Id:</b>	Division Chief
--------------------	-----------	-----------------	----------------

300A responded to a building fire that C-Shift personnel were working. Upon arrival, was briefed by 300C of the the operations that had taken place and what the current operations were. A face to face transfer of Command was completed. This Officer, 300A assumed Command and initiated a C to A-Shift transfer of personnel. The fire was reported out, however, black smoke was still visible from the Charlie side. Engine 2 was tasked with Positive pressure ventilation on the Alpha side. Once ventilation was stopped, two smoldering areas were located. One in the area of the initial seat of the fire and the other, several storage units over, where a filing cabinet was found smoldering. A third area with high temperature readings was found above the front office ceiling. All areas found were overhauled and extinguished with water. The temperatures were then rechecked. Engine 2 and Engine 3 continued checking for extention and overhaul. Engine 3 crew in the rear reported that smoke had completely dissipated in the Charlie side. L1 also advised of no visible smoke from the skylights. Both units reported clear interior visibility. At this point, all units but Engine 2 were tasked with breaking down the hoselines and preparing to clear and return to service. Captain 5 conducted a PAR Check of all units that exited the structure. Fire Investigator Layton was called, along with PD Investigator Henson. The States Fire Marshall Office was contacted and an Investigator was requested via dispatch. This Officer made contact with the business owner and property owner. Both were briefed of the initial findings and the FD's actions. Upon Investigator arrival, the scene was released to Investigator Layton and Engine 2, who remained supplied at the hydrant and had a jumpline deployed and ready at the entry, if needed during the Investigation.

FINAL
